Ruggero Maria Santilli on Albert Einstein

"Rather than being diminished by the advancement of physical knowledge, the stature of Albert Einstein is therefore magnified by the physical intuition and scientific honesty that led him to state as clearly as possible the physical arena of applicability of his ideas"

"There is no doubt that the mind who mastered the reduction of available knowledge into one, single, physical theory, the special relativity, was that of Einstein"

"IT IS THE DUTY OF EVERY PERSON TO HONOR THE MEMORY OF ALBERT EINSTEIN AS ONE OF THE SINGLE GREATEST CONTRIBUTORS TO HUMAN KNOWLEDGE"
