Barnmorskor sökes

Nytt paradigmska födas men födslovärkarna är svåra och det råder oenighet hur länge man sedan ska vänta med att klippa navelsträngen till det gamla.

Lön fås av den nyfödda när hon börjat förtjäna sitt eget uppehälle.

Med tack till min syster för tipset: Arcady Petrov "Light of eternity". Teknologistödd / datorstödd tro byggd på vetenskapligt tänkande och s.k. paranormala förmågor och/eller fotografi i ovanliga frekvensområden tycks vara en viktig del av framtidens teknologi.

Part 3 was posted on a forum with this presentation:

Independent scientific investigators established that real physical regeneration was achieved immediately using Arcady Petrov's technologies. Science says its not possible because its not supposed to be possible.

The word evolution does not only bear reference to any global processes... but also to each individual person. And every single person goes through his own individual transformation...Virtually everyone is able to attain these skills...

Blog Export: Intelligentsians blockering, <http://blog.lege.net/>

In our centre we have been developing specific trainings that teach some new parts of the brain, the neurons, to put it in the control of the stem cells the neurons are trained to operate by mutual consent... People open up to a new inner power.

To be able to use, after a certain time, their mental power to effect real physical results. For example by means of this method one can correct the health of individual human beings.

Specifically, in our centre we find that organs that were previously removed from the body by surgery, grow up again. That means it is sufficient to send these specific mental impulses to the areas of those chromosomes that are responsible for the previously removed organ, namely by conscious mental focussing.

Through this impulse the rebuilding of that organ is initiated. To this day we have hundreds of people who have regenerated new organs which was also confirmed by standardised medical diagnostics.

Even more, some people for example women who had lost reproductive organs before have not only restored these organs but also borne children afterwards. This shows that recovered organs fulfilled their functions properly.

This technologies are apparently called 'bio informative technologies'. Some testimonials are to the effect that not only have organs such as a uterus been regenerated but the patient feel they have become younger by several years.

Part 6 was posted on a forum with this presentation:

Discussion of holographic processes involved in regeneration and genesis.

After a restoration of an organ - the body starts to rejuvenate and regenerate their whole organism. This process starts slowly but then it accelerates.

This process enables the body to regenerate indefinitely. Arcady Petrov suggests that this implies immortality and eternal life is available to all humanity.
