### Testar USA laservapen på civila?

Det frågar sig Information Clearing House: "Star Wars in Iraq" is a new investigative report by Maurizio Torrealta and Sigfrido Ranucci.

RAI 24 News - Run Time 25 Minutes

According to official Pentagon sources, military vehicles equipped with this laser device have been used in Afghanistan to explode mines. According to two reliable military information sites – Defense Tech and Defence Industry Daily - at least three such vehicles are being used in Iraq as well and some people report having seen them.

...

Patrick Dillon Experimental weapons?

Majid Al Ghezali Yes... Yes, I think. They shoot the bus. We saw the bus like a cloth, like a wet cloth. It seemed like a Volkswagen, a big bus like a Volkswagen.

...

There were other inexplicable aspects: the terrain where the battle took place was dug up by the American military and replaced with other fresh earth; the bodies that were not hit by projectiles had shrunk to just slightly more than one meter in height.

Majid Al Ghezali Except the ones killed by the bullets, most of them became very small. I mean... like that... Something like that.

When we asked Majid what weapon he imagined had been used, he said that he had reached the conclusion that it must have been a laser weapon.

Majid Al Ghezali One year later we heard that they used an update technology, a unique one, like lasers.

We found another disturbing document on the use of mysterious weapons in Iraq, which referred to episodes that took place almost at the same time as those described by Majid al Ghezali.

Saad al Falluji They were 26 in the bus. About 20 of them had no head, the head had been cut, some of them had no arms or no legs. The only unwounded was the driver and really I don't know how he reach our hospital, because one arm was on his side, one head just beside him. It was a very strange and horrible situation. In the roof of the car there were parts of the body: intestines, brains, all parts of the body. It was a very very very miserable situation.

Geert Van Moorter (medical doctor working in Iraq during and after the war, as a volunteer for the belgiam NGO Medical Aid fot the Third World) Do you have idea with what kind of weapon the attacked the bus?

Saad al Falluji We don't know with what kind of weapon they hit this bus.

Doctor n°2 It seems to be a new weapon

Saad al Falluji Yes, a new weapon

Doctor n°2 They are trying to do experiments on our civilians. Nobody could identify the type of this weapon. Förresten läste jag precis en intressant mening i Eric Laurents Bushs okända värld - religionen - affärerna - de hemliga nätverken. Nämligen ur George W. Bushs första tal som president, där han förklarade att en «ängel svävar över dessa virvlar och leder denna storm». Jag tänker att jag inte vill ha något att göra med Bushs ängel - och att då detta var ett förberett tal så är det knappast en slump att han sa så där. Det kan vara klokt att försöka förstå EXAKT vad det är han föreställer sig...

Andra bloggar om: laservapen, usa, irak, star wars, bush

Inlagd av Leif Erlingsson i Hyckleri, Irak, Absurditeter gör ohyggligheter, Mänskliga rättigheter, Politik, Neocons, USA kl 13:42

Ett annat tips att följa upp: Googla "Haarp":  
<http://google.com/search?q=Haarp>

När jag följde upp en av träffarna hittade jag denna fascinerande bok:

The Fantastic Inventions of Nikola Tesla  
by Nikola Tesla  
... in Tesla's own words:

His plan to transmit free electricity into the atmosphere.

How electrical devices would merely have small antennas on them.

Why unlimited power could be utilized anywhere on earth.

How his inventions could utilize this free energy in the atmosphere.

How anti-gravity airships could draw power from the towers he was building.

How radio and radar technology can be used as death-ray weapons in Star Wars.

Includes an appendix of Supreme Court documents on dismantling of his free-energy towers.

Includes an appendix of Supreme Court documents on dismantling of his free-energy towers.

Tesla's Death Rays, Ozone generators, and more...

Men glöm inte att följa upp Haarp!

Jag har en bekännelse att göra: Jag beställde just boken ovan, samt även:

Angels Don't Play This HAARP

by Dr. Nick Begich and Jeane Manning

Angels Don't Play This HAARP : Advances in Tesla Technology by Dr. Nick Begich and Jeane Manning is a book gaining wide publicity throughout the United States having been featured on hundreds of radio programs, news reports and television programs. This book was named one of the most important books of 1996 by Project Censored : The News that Didn't Make the News. The book is the subject of talk radio programs six to twelve times a month on both national and regional programs. The book is in its third english printing since being released in September, 1995. Translations were released in Japan and Germany in 1996.

The U.S. Military's first target is the electrojet: a river of electricity that flows thousands of miles through the sky and down into the polar icecap. The electrojet will become a vibrating artificial antenna for sending electromagnetic radiation raining down on the earth. The U.S. military can then "X-ray" the earth and talk to submarines. But there's much more they can do with HAARP. This book reveals surprises from secret meetings.

Och när jag ändå är inne på temat böcker så skulle jag vilja nämna en till som jag allvarligt funderar på att skaffa:

The Holographic Universe

by Michael Talbot

... there is evidence to suggest that our world and everything in it... are also only ghostly images, projections from a level of reality so beyond our own it is literally beyond both space and time." Hence, the title of his book. Beginning with the work of physicist David Bohm and neurophysiologist Karl Pribram, both of whom independently arrived at holographic theories or models of the universe, Talbot explains in clear terms the theory and physics of holography and its application, both in science and in explanation of the paranormal and psychic. His theory of reality accommodates this latest thinking in physics as well as many unresolved mind-body questions. This well-written and fascinating study is recommended for science collections.

- Hilary D. Burton, Lawrence Livermore National Lab., Livermore, Cal.

(Och Lawrence Livermore National Lab. är ju ett av de mest hemliga militära labben, där de har koll på en massa "svart" vetenskap - sådan som det civila vetenskapssamhället inte får tillgång till - så jag fäster stort avseende på bedömanden om hur verkligt något är, som kommer därifrån.)

Alldeles oavsett att jag uppenbarligen utforskar verklighetens gränser så anser jag att det viktigaste är hur vi behandlar andra: Om vi tycker att det är OK att koka civila med laservapen, då är det något som är riktigt rejält fel. Då behöver vi börja analysera våra egna inre. Istället för att projicera vår energi på "de andra"...

Den engelske parlamentarikern Galloway sticker ut hakan. Eftersom det säkert kommer att vinklas av svenska taltrattar för imperiet så postar jag här länk till vad han egentligen sa:  
Galloway stands by Blair comments

"Mr. Blair has murdered more than 100,00 people in Iraq."

Respect MP George Galloway says he stands by his comments that it could be "morally justified" to assassinate Tony Blair. He told Radio Four's PM the Iraqi people had a right to resist their occupation by targeting those giving the orders.

Hahah, detta var den roligaste sida jag sett! :-)

Fortsätt att skriva skämtartiklar.

Först trodde jag det var en allvarlig sida, men efter ett tag såg jag att det bara var skämt.

Kul sida! :-)

Häls. Berre

Svar: Efter noggrant övervägande har jag valt att ibland publicera om väldokumenterade ämnen även när dessa går bortom det som betraktas som sunt förnuft. För som en viss UFO-forskare vid namn Albert Einstein en gång lär ha sagt, sunt förnuft är bara summan av alla fördomar.

Men att våga ifrågasätta sina mest grundläggande föreställningar gör ont i hjärnan, och kanske måste man vara lite speciell - som t.e.x. den gode Einstein - för att våga sig på ett sådant projekt.
